

RemPhos LED T5 Solves a Maintenance Headache

LOCATION: BETH EL TEMPLE CENTER, BELMONT, MA

PRODUCT USED: REMPHOS TOTALTUBE T5

APPLICATION: DONOR BOARDS IN LOBBY

A Reform Judaism congregation in Belmont, MA had a simple problem: the fluorescent T5 lamps illuminating their beautiful donor boards kept burning out. The boards were too dark to read, due to constantly burnt out fluorescent lamps, hence not adequately honoring the donors listed. RemPhos to the rescue! We donated our LED TOTALTUBE T5 ballast compatible tubes to Beth El congregation. Installation was simple, plug & play, removing the old fluorescent lamps and easily replacing with our LED T5s. Now the signage is properly illuminated, and virtually maintenance free since the new LED lamp has 5x the life of the old technology. As an added bonus these LEDs pull less than 1/2 the wattage.
