

No Energy Star or DLC Category? No Problem!

"Instead of a Utility Rebate... Special Limited Time Pricing"

RemPhos Technologies offers its LEDSS series of LED screw in replacement lamps to replace HID/MH/HPS from 50-250W. The LEDSS® has an internal driver which accepts 120-277V AC, has efficacy greater than 110LPW, is fully UL Listed, waterproof and can be used inside (some) fully enclosed fixtures (contact us for max. allowable temperatures).

Unfortunately Energy Star and DLC have not yet created categories for this product. RemPhos and LFE Solutions have teamed up to offer its customers an incentive up to \$80 off per LEDSS® lamp to help offset the lack of incentives from your local Utility. All you need to do is mention this offer to your distributor for this *LIMITED TIME OFFER* reduced pricing.
